

NOTICE TO THE PUBLIC

All School buildings* in SAU #48, with the exception of Plymouth Elementary School, were inspected for the presence of asbestos containing materials in 1989. All buildings were most recently re-inspected in March of 2010. The Waterville Valley Elementary School no longer contains any asbestos containing materials as of April 26, 2000. The Thornton Central School no longer contains asbestos containing materials as of June 2003. The Campton Elementary School no longer contains asbestos as of June 2006. The Wentworth Elementary School no longer contains asbestos as of July, 2009. The condition of the asbestos containing materials will be reviewed every six months.

Written plans have been developed for managing these materials while they are in place. These plans are on file at the SAU #48 Facility Directors Office at 86 Old Ward Bridge Road, Plymouth, New Hampshire, 03264. Plans may be reviewed during regular business hours. Copies of the documents are available for a fee.

For further information contact Jon Francis, SAU #48 Facilities Director, 86 Old Ward Bridge Road, Plymouth, New Hampshire, 03264/536-1254.
